THE GLEICHEN CALL

VOLUME XXXI NO. 39 GLEICHEN, ALBERTA, WEDNESDAY DECEMBER 14, 1938 SUBSCRIPTION $2.00 PER YEAR

SALVATION ARMY COM. G. L. CARPENTER PAYS VISIT HERE

Commissioner Geo. L. Carpenter, head of the Salvation Army for Canada, Alaska, Newfoundland and Bermuda, visited Eventide Home last week for the purpose of inspection and before he left surprised Adjutants Mr. and Mrs. J. J. Sutherland by promoting them to the rank of majors. The Commissioner was accompanied by Brigadiers Ham and Oake.

As the party arrived they were met in the front hallway and given a hearty welcome by the staff and the aged gentlemen. The latter made an archway of canes decorated with the Army colors yellow, red and blue ribbands. The Commissioner responded with a bright speech to the assembly. After looking over the Home lunch was served. Commissioner Carpenter stated he was greatly pleased with all he had seen and was surprised at the size of the institution and the efficiency with which it was managed. He had visited and opened many homes some as far off as Australia but none was comparable with Gleichen Eventide Home. He also expressed satisfaction with the farm recently purchased adjoining the Home.

Later he visited the Hospital and after looking it over was so delighted with what he had seen right then and there promoted Adjt and Mrs. Sutherland to the rank of majors to their complete surprise. After the service and speaking to most of the patients personally, the party left by car for Calgary where they were booked for a number of meetings during the afternoon and eveing.

Majors Sutherland have been in charge of Eventide Home for ten years coming here as captains, later they were promoted to ensigns, then adjutants and now majors. They have risen in this ranks as rapidly as it is possible for anyone in the Army to do so. The Call joins with their many friends in extending to them the heartiest congratulations in their success in attaining the rank of majors.

THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan"

A dream after O. Henry's story "The Guilty Party."

The other night I fell into a disturbed sleep after reading the sad news from Europe. I had a vision that the affairs of this world were being tried by the Great Ultimate Court. In the prisoner's box stood certain all-powerful dictators. "They are charged," said the official prosecutor, "with having invaded other peoples lands, with having threatened to bomb cities, and with having brought destruction, death and suffering upon thousands."

"It is not altogether their fault" said the defending counsel as he made explanations to the court. "Bring them before us then" said the court, "the other parties who are equally guilty. These statesmen who raised tariffs and imposed restrictions against commerce, which made it impossible for these dictators to obtain foodstuffs and other products their people needed."

"But if it please the ocurt," said the defending Angel defending absent ones, "those statesmen who raised tariffs did not fully realize then what the disastrous consequences would be." "Then all the more guilty are they" said the Great Court, "for those who have power over others should ever attempt to foresee the ultimate consequences of their acts."

"I am glad that was only a dream" I said to myself, as I awakened with a shiver.

Following factors have tended to raise price: Continued demand for wheat in India. Moisture deficient over large areas in the U.S.A. winter wheat belt Active European demand for Argentine corn. India buys Canadian wheat. Insects damage Argentine crops. Sharp reduction in U.S.A. winter wheat acreage. Chile limits shipments of winter melons.

Following factors have tended to lower price Commercial estimates of Argentine wheat crop 280 to 300 million. Yields in Cordorba and Santa Fe about average. Belgian millers instructed to grind 40 per cent native wheat. Britain agrees to purchase large quantities of U.S. subsidized wheat. Germany makes barter agreement for wheat and corn with Roumania.

News Items of Local Interest

Jack Wyndham who has been absent from town for a long time paid his old friend W. W. Brown a lengthy visit Monday.

Livingsprings school has changed the date of their Christmas entertainment from Dec. 22 to Wednesday December 21.

The boys of the 22nd Battery are staging a turkey shoot next Saturday in the Armoury and invite everybody to attend.

The annual New Year's dance put on by the Battery will take place on Monday evening, January 2nd, in the Community Hall. As usual the boys will make the dance an elaborate affair and one of the social events of the season.

R. S. Haskayne, the popular proprietor of the Pioneer Meat Market will give away a prize to the person who can guess nearest the weight of a carcass of beef. For some years Mr. Haskayne has staged this contest every Christmas and it has always created a lot of interest.

One of the joys of childhood has passed away, we fear, forever. Each Christmas we used to receive a round, golden disc with milled edges, heavy and bright, that clinked most musically. We could not bring ourselves to part with it and we seemed incredibly wealthy. Christmas was never quite the same after they called in those golden messengers of joy and to tell the truth, our confidence in banks was a trifle shaken.

A card party was very much enjoyed when Mrs. Justen was hostess. The evening was started off by playing an amusing game, after which eight tables were kept busy playing whist. Mrs. H. Day won ladies first prize and Mr. J. Bell gents first. Consolation prizes went to Mrs. McKeever and Mr. Stankievech. A very enjoyable lunch ended up the night or rather morning.

Hansard, the printed record of parliamentary debates, which may be changed, records at a rough estimate, something over five million words at each session of Canada's House of Commons. So perfect is the system of recording debates at Ottawa that a member speaking when the house closes at 11 p.m. has the printed verbatim report on his desk at 11 the next morning. Strange as it may seem, Canada had an official report of parliamentary debates before the mother of parliaments at Westminister. In 1875 a contract was awarded at $600 a week for the reporting of the Commons debates, and in 1880, twenty-nine years before the British parliament adopted a similar plan, the Canadian government established its own "Hansard." It was described to the British committee by Lord Lee of Farnham as the best in the world.

FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Gleichen's new brass band held its first practice and gives promise of becoming a success. W. J. McMullen is the new leader and already has shown that he is the right man in the right place The members who turned out for the first practice are: Messrs. Bates, Lyons, Jens, McMullen, Parsons, Dunsmuir and McCreary. They will soon be agumented by others as many are interested.

P. Burns was a guest of the Messrs. McHugh Bros. at the Palace Hotel

John Clark, the well-known Clydesdale breeder is moving into his new house on Crowfoot Creek, which is a fine large one and modern in every respect.

P. Rhodes, the Blind Creek postmaster, accompanied by his wife, father and mother, left to spend the winter in Florida.

Mrs. Harrison arrived Saturday from Calgary to nurse her son-in-law R. Landells, who has since recovered from his illness.

A public meeting convened by T. H. Beach was held in the office of Messrs. Henderson & Mallory, at which it was decided to erect in Gleichen, with as little delay as possible, a suitable monument on which to inscribe the names of the soldier boys from this town and district, as a lasting record to their home and empire. The plot next to the town hall and opposite the post office was selected. The cement foundation is to be laid at once. It is also hoped to obtain from the Dominion government some captured guns, which placed near would ever be a speaking reminder of what our boys have faced for us. The committees are: Chairman T. H. Beach, secretary Rev. Matheson; selection and purchasing committee T. Henderson and W. W. Brown; finance W. H. James and F. Lett; subscription committee: convenor Douglas Hardwick, James Cameron, James Young and W. Evans for Gleichen; William Brown, Sr., and Milo Munroe for Queenstown; Glenn House for Arrowwood; R. Mace for Blind Creek; Harry Scott for Stobart; Duncan McBean for Namaka; Geo. Day for Standard; Duncan Clark for Crowfoot Creek; Murice Moynier, Samuel Slater and F. Stevens for Ouellette-ville and Cluny.

LADIES S.C. GROUP MEET

Sixteen members of the Meadowbrook Social Credit Group met in the living room of Mrs. Claude Rouecbe's home on December 8th for the regular semi-monthly meeting. Mrs. Rouecbe was assisted by Mrs. Erford. Business old and new was dealt with by the secretary and filed away.

A motion was carried to donate the sum of $5.00 to the radio Sunday School of the Bible Institute. The Christmas basket was passed around after which the meeting adjourned and the hostess served a very dainty tea.

On January 5th, a social evening will be held in the Community Hall B. Hayes.

SING HO! MY HEARTIES!

And Let's Have Canadian Fish For Dinner

The family bring zestful appetites and gay good humor when you have a delicious dish like this Canadian haddock marinara for dinner If fillets of fresh haddock are available, use them. If you live where it is easier and cheaper to use canned Canadian chicken haddie, you will find the flavor of this fresh-packed Canadian fish makes for second helpings and requests to have the same thing often.

Here's the easy way to make it.

1 small onion, minced; 2 tablespoons salad oil; 3 cups canned tomatoes; 1 bay loaf; 5 whole cloves; ¼ teaspoon thyme; 1 can Canadian chicken haddie.

Brown onion in oil; add tomatoes and seasonings and simmer 30 minutes; add fish. Cover and simmer for 10 minutes. Serves six.

Canadian macaroni or spaghetti, broken in small pieces, and made with our fine Canadian wheat, is an excellent accompaniment for this dinner special. For vegetable, select canned green beans, and top off the whole with a baked apple or an apple turnover, spicy with cinnamon and brown sugar.

With this Canadian haddock marinara you have a dish fit for the king of the household, nd after all, who is more important than father, when it comes to a good dinner.

ST. ANDREW'S CHURCH

Christmas service and Holy Communion at 11 a.m.

Rev. G. W. Lang, B.A., (Incumbent.)

Please note the above will be the Christmas service and it is hoped that as many as possible will turn out for this service.

LOCAL SCHOOLS WILL ENTERTAIN NEXT WEDNESDAY

The annual school entertainment will be held in the Community Hall next Wednesday evening, December 21st starting at 8 o'clock sharp. Pupils from all the rooms will take part in the program consisting of sketches, songs, plays, recitations, etc. The money taken in from admission fees will be used to buy equipment for the new courses now being taught. It is hoped that all who can will attend and if the usual crowd turns out the hall will be filled to capacity.

WATSON-WILSON

Holy Trinity Church, Yorkton, Sask, was the scene of a quiet wedding on Saturday, Dec. 3rd, when Miss Gladys E. Wilson, daughter of Mr. and Mrs Thomas Wilson of Gleichen, became the bride of Mr J. G. Watson, son of Mr. George Watson, 122 Balmoral St., Yorkton. Rev S. Williams officiated. Mr. and Mrs. James Allen, were the attendants, only the imediate relatives were present. After the ceremony the happy couple and attendents returned to groom's house, where a dainty lunch was served. Mr. and Mrs. Watson have taken up residence at 88, 5th Ave., Yorkton, Sask., where Mr. Watson is engaged in map drafting.

GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.
11 a.m. Church School.
Mrs. H. Birch, choir leader.
Miss Marjorie Birch, pianist.
11 a.m. Church School.
8 p.m. The congregation has been invited to join with the worshippers at the chapel of Old Sun School.

Unless the night should be stormy it is hoped that as many as possible will avail themselves of this opportunity to express the spirit of friendliness and goodwill as we approach the Christmas season.

Yuletide Greetings by TELEGRAPH AND CABLE

Substantially reduced rates to all points in Canada, United States and Overseas.

The cost does not exceed that of any good form of greeting.

In this happy season telegrams of greeting are most appropriate tokens of love and friendship.

The joyous Yuletide spirit is decidedly emphasized in the greeting on the telegraph blank, and cannot fail to leave a lasting impression!

The many miles that separate friends and relatives are only a few minutes distant by wire. And the cost this year is surprisingly low.

Any of the prepared texts on display at your local telegraph office will be delivered on an appropriately decorated Yuletide telegraph blank in Canada or the United States at these low following rates:

Between offices west of and including Fort William, Ont.

25 cents (and tax)

Between offices East of Fort William, Ont., and offices west of Fort William Ont.

and

between Canadian Pacific offices in Canada and Postal Telegraph Co. offices in United States.

40 cents (and tax)

and

For $1.00 (and tax)

Any of the overseas texts will be delivered in Great Britain Irish Free State, Belgium, Denmark, France, Germany, Holland, Switzerland, Italy and many other countries at the rates indicated above.

Full particulars gladly furnished at the local

CANADIAN PACIFIC TELEGRAPH OFFICE

Have you any news to tell the editor if so he will be glad to publish it. In case you do not happen to meet him on the street use the telephone or the mail. You will be helping make this the local paper of greater interest to munity. Whatever news may interest you, must surely interest others.

Guessing Contest

A set of Carvers will be given to the person who can guess the correct weight or nearest weight of a carcass of beef, and a 10 pound turkey for the second prize.

This animal is a three year old, prime, fat heifer and will be hanging in two sides in our Market from December 19th until Christmas Eve when it will be weighted.

We invite you to drop in and see a wonderful display of Fancy Home Killed Livestock.

We guarantee all our turkeys to be young 1938 turkeys. We advise you to order early before they are picked over.

A Dwindling Asset

Disconcerting, to say the least, are the latest official figures of automobile tourist traffic across the international boundary between the United States and Canada.

With agriculture in the doldrums the people in this country have been watching with approval and a measure of comfort the growth of the American tourist traffic in Canada, regarding it as a lusty young industry which gave promise of making up for some of the losses sustained by agriculture, if not immediately, at any rate in the near future.

The tide of tourist traffic Canada-ward from the United States has been flowing strongly across the international border in recent years and has been growing with remarkable acceleration until the trade has assumed the rank of the second largest industry of this country.

While, of course, the major portion of this comparatively new industry has to date been enjoyed by the provinces of Ontario and Quebec in the east and British Columbia in the west, due principally to their geographic proximity to American centres of dense popularity, still the prairie provinces have been reaping a modicum of benefit and enjoying some measure of the increase until now.

* * * *

The Wrong Direction

Now, however, it would appear that the pendulum is showing a marked tendency to swing the other way, since official figures for the month of September not only show a reduction of American tourist automobiles coming into Canada but an increase in the number of Canadian tourist cars going into the United States for periods long enough to place them in the tourist category.

In other words, the September figures demonstrate that the number of American visitors to this country, and hence the amount of money they are spending here, is declining, while the number of Canadians who are spending their time and money in search of pleasure on the other side of the line is showing an upward trend.

The September figures show that in that month approximately 6,000 more Canadian cars were admitted into the United States "for touring purposes" than in the corresponding month of 1937, while a decrease of 23,158 in the number of American cars entering Canada for periods ranging from 48 hours to 60 days is recorded. The latter is a substantial figure when based on a total entry of 174,637 American cars for the month of September.

While over the Dominion as a whole American cars entering Canada outnumber Canadian tourist cars travelling southward by five to one, entries across the boundary along the prairie provinces, in either direction, show a reduction on the wrong side, if the September figures are any criterion of the entire summer movement, and there is no reason to suppose they are not.

The figures show that during September a total of 6,476 Canadian tourist cars travelled south across the boundary while only 4,617 northbound tourist automobiles passed through prairie customs ports, roughly a ratio of three to two on the wrong side of the economic ledger.

This appears serious enough when the figures demonstrate that for every two Americans spending money in the prairie provinces for gas and oil, meals and accommodation three prairie Canadians are spending cash for similar services in the United States, but that is not the whole story, for further statistics show that Canadians are spending considerable sums for the purchase of commodities in the United States and bringing them back under the $100 duty exemption clause, spelling a further loss to business on the Canadian prairies.

During the six months ending September 30, Canadian tourists returning to this country brought into Canada under the duty free clause merchandise valued at approximately $5,000,000 of which $4,553,900 was spent in the States. Nearly half that amount went in clothing and a round half million each was spent for household appliances and boots and shoes. Another $350,000 was exchanged for radios and nearly $135,000 for auto tires, tubes and accessories with a further $873,000 for miscellaneous commodities.

* * * *

The Obvious Remedy

The cause for this situation is not far to seek, when a comparison is made between the condition of the highways in the prairie provinces during the past few years with those in the Western United States. It is not surprising to find that American tourists in increasing numbers decide to do their travelling on their own side of the boundary and that Canadians in the west in increasing numbers travel south to escape their own bad roads and travel over the smooth highways which are to be found in the western U.S.A. And to this the incentive to save a little money or to at least pay the cost of a two or three day pleasure trip on the savings made on one hundred dollars' worth of purchases, and surprise that Western Canadians are crossing the border in increasing numbers should disappear.

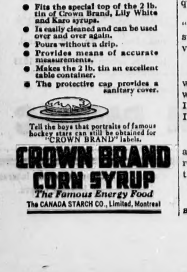
The obvious remedy, of course, is to rehabilitate the disintegrating highways in the prairie provinces and to build more, and perhaps some reduction in the tariff on some of the commodities which are purchased at a saving on the other side of the line to bring prices into closer parity, would help to restore the flow of tourist traffic from the south and stem the southward tide of Canadian tourists.

Had some of the $120,000,000 which has been spent on relief been expended roads, work would have been found for many who have been more or less idle for years and the taxpayers would have had at least a partially self-liquidating asset in return for some of the expenditure.

Firemen Had Alibi

Volunteer firemen did not respond Nov. 1 when the fire siren sounded at Hart, Mich., so J. D. Luttrel's house burned down. Town officials demanded an explanation. "We thought the siren sounded to mark Armistice Day," firemen shamefacedly replied.

Ten rabbits will eat as much grass and pasturage as one sheep.



It's free—write for one NOW

- Fits the special top of the 2 lb. tin of Crown Brand, Lily White and Karo syrups.
- Is easily cleaned and can be used over and over again.

Other Worlds

Scientist Discusses Probability Of Life On Sister Planets

Life probably once flourished on Mars but is "almost impossible" now, according to Dr. Spencer Jones, astronomer royal.

He said in a speech at Leeds, Eng., Venus was the only other planet at all likely to support life and even there it could only be a primitive form.

Speaking of Mars, the astronomer royal declared "life probably flourished there millions of years ago but has been dried up by the atmosphere and has probably by now become almost impossible.

Atmosphere on Jupiter—a rocky planet about 22,000 miles in diameter—was so dense the pressure was equal to about 1,000,000 tons per square inch.

"We can't conceive that life can exist on such a surface at such a pressure," he said.

No oxgyen had been detected on Venus but there was an enormous quantity of carbon dioxide around it.

"Venus is a world," said Dr. Jones, "where life has probably not yet started or, if it has, exists only in very primitive form."

The Bible contains two chapters which are nearly alike, word for word. They are the 19th chapter of II. Kings and the 37th chapter of Isaiah.

Japan has banned the production and distribution of electric fans and refrigerators except when needed for the essential industries.

FINE CUT

Considered A Luxury

People In West Indies Eat Apples Only At Christmas

The Canadian trade commissioner at Trinidad has been reporting on apple consumption in the West Indies. Apparently it is not very large. Total imports amounted to only $33,-016 last year, two-thirds of them coming from Canada, but not from British Columbia, since they were imported in barrels.

The trade commissioner tells us that the West Indian people consume apples as a luxury and mostly at Christmas. The fruit is sold through "marchands" or negro women street vendors, who put down a deposit on a barrel and pay a little more daily as they withdraw the fruit.

The description of the method of sale is a reminder that it was from his apple business—selling costards or apples from his barrow—that the English costermonger got his name. —Vancouver Province.

SELECTED RECIPES

PINEAPPLE DELIGHT

1½ cups cream
½ cup pieces pineapple, cut small
12 marshmallows, cut small
¼ cup nut meats, chopped
12 Christie's Social Tea Biscuits, crumbled

Beat cream and fold in pineapple, marshmallows, nut meats and two-thirds of the crumbled biscuits. Put mixture into six individual sherbet glasses and sprinkle with remaining crumbs. Six portions.

JIFFY MAYONNAISE

1 egg
2 tablespoons Crown Brand Corn Syrup
1½ teaspoons salt
2 teaspoons dry mustard
⅛ teaspoon paprika
¼ cup vinegar
¾ cup Mazola
¼ cup Benson's or Canada Corn Starch
¼ cup cold water
¾ cup boiling water

Method: Put the egg, Crown Brand Corn Syrup, seasonings, vinegar and Mazola in a bowl but do not stir. Make a paste by mixing Corn Starch with cold water; add boiling water. Cook until clear. This is better done in top of double boiler but it is not necessary. Add the Corn Starch mixture to ingredients in mixing bowl and beat with dover beater. It thickens and combines beautifully. (Yield—1 pint).

In some cases counterfeit money in Great Britain has been found to contain more silver than the money issued by the Royal Mint.

It is a mistake to eat all you can, spend all you have, tell all you know or show all you feel.

MUSCULAR RHEUMATIC PAINS—ACHES

It takes more than "just a salve" to bring relief. It takes a *"counter-irritant"* like good old Musterole—soothing, warming, penetrating and helpful in quickly overcoming the local congestion and pain when rubbed on the aching spots.

Muscular lumbago, soreness and stiffness generally yield promptly.

Better than the old-fashioned mustard plaster, Musterole has been used by millions for 30 years. Recommended by many doctors and nurses. *Made in Canada*, in three strengths: Regular, Children's (mild), and Extra Strong. All druggists, 40¢ each.

MUSTEROLE
BETTER THAN A MUSTARD PLASTER

Building Projects

Western Canada Showing Interest In Building Homes

Western Canada has shown considerable interest in building homes with the aid of the National Housing Act, according to J. Clark Reilly, secretary of the Canadian Construction Association, after a trip to the West coast.

"British Columbia is showing quite a bit of activity in housing," said Mr. Reilly in an interview. "The west coast province was slow to take advantage of the act, but now building is proceeding with ready co-operation from the insurance companies who are making the loans necessary for construction."

Considerable use of the Housing Act was being made on the Prairies, he said. Edmonton would vote shortly, he understood, on a project for construction of a block of low-rent homes by the city. Civic housing projects also had been discussed in Winnipeg.

"Personally, I favor formation of private companies to erect and administer such housing projects," said Mr. Reilly.

Housing will form a main topic of discussion at the 21st annual convention of the Canadian Construction Association in Winnipeg next Jan. 10, 11 and 12, Mr. Reilly said.

DRESSMAKER HAD TO QUIT SEWING

Hands Swollen With Rheumatism

Pity this poor dressmaker! Nine-tenths of her work consists of sewing—and she was not able to sew. Rheumatism in the hands was her trouble, and she tried any number of remedies. But nothing helped much —until she came to Kruschen.

"Three-and-a-half years ago," she writes, "I had a violent attack of rheumatic pains. My feet and hands were swollen. The pain was terrible. I was really quite crippled and helpless.

"I tried many remedies without success. Then I started on Kruschen Salts, and after one month, I could stand up again. Then, I walked with a cane. In three months, I was quite well again. As I am a dressmaker, you can imagine what it meant to me not to be able to work my sewing machine. What a treat it is to be able to walk, to work, and to be free from pain."—(Mrs.) E.S.

The stabbing pains of rheumatism are often caused by needle-pointed crystals of uric acid lodging in the joints. Kruschen brings relief because it helps to dissolve those troubling crystals and to expel them from the system.

New Magnetic Metal

Can Be Made To Shiver When Everything Else Is Hot

A new magnetic metal that can "shiver" and turn on the heat was announced at the Battelle Memorial Institute, Columbus, Ohio.

The shivering of this metal consists in losing its magnetism. It can be made to do this at any temperature from 150 below zero to 1,100 above.

This makes possible use of magnets of the new alloy for numerous automatic controls. Leaing or regaining their magnetism, they operate electric switches.

They can be made to turn on the heat at 50, and shut it off when the temperature again rises. Unlike thermans they can be fixed to "shiver" when everything else is burning up.

They will turn on a fan at 90, start a fire sprinkler or sound a fire alarm, control refrigeration and air conditioning. They will protect electrical machinery from overheating at any temperature up to red heat by "shivering" and shutting off the power.

Manitoba Farming Reduced

More than 1,000,000 acres of land has gone out of cultivation in Manitoba since 1921, Prof. J. H. Ellis, of the University of Manitoba, estimates in a report on soil conditions in the province. Only 7,789,920 acres were under the plow in 1936, compared with 9,022,738 acres in 1921, he reports.

Venus travels an orbit that lies inside that of the earth. Therefore, when she is nearest us, she is directly in line with the sun and we can see only her dark side.

A certain fish found in the Great Barrier reef of Australia is armed with spikes which contain a deadly poison capable of killing human beings.

Muskrat Restoration

Conservation Project In The Interests Of The Indian Population

Investigations into the possibilities of improving the production of muskrats are now being carried out in selected areas of the Wood Buffalo Park, Northwest Territories, by the Department of Mines and Resources, Ottawa. Due to low water levels the muskrat has disappeared from many areas where formerly it was plentiful and the plans provide for the construction of dams and dirt fills to regulate water levels with the object of making these areas again suitable for muskrat ranching.

Following a reconnaissance survey of the delta country north of the west end of Lake Athabasca and adjacent to the Upper Slave River, the Murdock Creek drainage basin, comprising approximately 40,000 acres, was selected as being suitable for much an experiment. The country adjacent to Murdock Creek is low, with many sloughs and marshes draining into the main stream and, therefore, only a comparatively small expenditure is required to establish water control. A dam is being built about a mile and a half from the mouth of Murdock Creek, which marks the initial step in the government's undertaking to re-establish the muskrat in this district. This conservation project has been launched in the interests of the Indian and half-breed population living in the region, many of whom hold permits to hunt and trap in the Wood Buffalo Park.

One of Canada's principal fur resources, the muskrat provides an important means of livelihood to the natives, both as a source of revenue and food. The animals rapidly respond to protection and with the restoration of the muskrat habitat and the subsequent return of these prolific animals the economic welfare of the Indian and half-breed population should be materially improved.

Taking Every Precaution

To Make Travel On Trans-Canada Airlines Safe

Referring to the Trans-Canada Airlines plane crash near Regina in which two pilots were killed, Hon. C. D. Howe, minister of transport, said that "it is the first accident of any kind since T.C.A. began and though we all take the accident to heart we do believe our record is as good as any in air travel."

Speaking at the convention in Ottawa of the Canadian Association of Tourist and Publicity Bureaux, Mr. Howe stated that "before we take passengers on T.C.A. we will be sure every precaution that possibly can be taken will be taken."

Unless automobile bodies are made of steel, tropical wood, or treated wood, fungus growths will cause them to fall to pieces in short order, in the Philippines.

Some 300,000 lost articles are picked up on London buses annually, and only about one-third of them are reclaimed by their owners.

Student From Britain

Trust Fund Gives Travelling Scholarship In Canada

The Imperial relations trust has selected J. H. Franklin of Grimsby for a travelling scholarship in Canada. He will enter the University of Toronto January 3.

The trust administers a £250,000 ($1,250,000) fund given anonymously in appreciation of Earl Baldwin's service to the empire. It is designed to strengthen the bonds of the British commonwealth of nations.

Under the terms of the scholarship Mr. Franklin will "make a preliminary survey of the particular aspects of life" he wishes to study. Later he will get in touch with trades unions to get an insight into labor conditions as well as learning something of the social and cultural life of the dominion. After his return to England he will be expected to submit a report.

A student for Australia also was selected at the meeting. Lord Baldwin presided.

Did Well At Exhibition

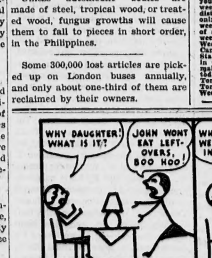
Canadian Exhibitors Satisfied With Their Success In Glasgow

Canadians joined with canny Scots in taking stock of results of the Empire Exhibition which several weeks ago closed its doors after a successful season. Oscar Turcotte, Canada's Exhibition commissioner, declared all the Dominion's exhibitors had "done very well indeed. In fact, some of them did better in the first three months than they expected to do in the whole of the exhibition." He said 1,000,000 samples had been sold at the Canadian Government sample stand and both the big railways had received many inquiries and booked passages to Canada direct from the Canadian Pavilion.

In 1804 the Bible had been translated into 72 languages; to-day it has been translated into 835.

Trucks represnts approximately 13 per cent. of all motor vehicles and pay 25 per cent. of all motor taxes.

Successful vaccinations against disease have been performed on silkworms, it is said.



EARN 50¢ to $2.00 OR MORE EVERY WEEK

Thousands of boys from Coast to Coast have Star Weekly routes that pay them well each week. If you are alert and a go-getter you can earn 50c to $2.00 or more a week with a Star Weekly route in your district if it is not already covered. If only requires an hour or two's work a week. You can easily build up a route of steady customers for Canada's favorite weekly-and pocket handsome profits. The Star Weekly is the only publication boys like to read. The Star Weekly has not other publications in Canada. So don't miss this chance to make some regular pocket money. Write today to Circulation Department A, Toronto Star Weekly, King Street West, Toronto, for particulars. Become The Star Weekly boy in your district.

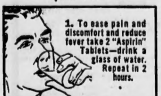
DO THIS

TO RELIEVE PAIN AND DISCOMFORT OF A COLD

Follow Simple Method Below Takes only a Few Minutes When "Aspirin" is Used



3. To ease pain and discomfort and reduce fever take 2 "Aspirin" Tablets—drink a glass of water. Repeat in 2 hours.

2. If throat is raw from cold, crush and dissolve 3 "Aspirin" Tablets in ½ glass of water . . . gargle.

Eases Pain and Discomfort and Sore Throat Accompanying Colds Almost Instantly

The simple way pictured above often brings amazingly fast relief from discomfort and sore throat accompanying colds.

Try it. Then—*see your doctor.* He probably will tell you to continue with "Aspirin" because it acts so fast to relieve discomforts of a cold. And to reduce fever.

This simple way, backed by scientific authority, has largely supplanted the use of strong medicines in easing cold symptoms. Perhaps the easiest, most effective way yet discovered.

Arctic Weather Forecasts

Would Assist Canadian And U.S. Farmers, Says Scientist

Arctic weather forecasts so far in advance they could guide Canadian and United States farmers in their crop planting were predicted by Captain Clifford MacGregor, explorer and meteorologist.

MacGregor, recently returned from a 15 month Arctic meteorological expedition, said he would recommend establishment, through international co-operation, of six weather stations above Canada north of a latitude of 70 degrees. No meteorological data are collected in this vast area at present.

"There is a permanent low-pressure area in that Arctic region," MacGregor explained, "and there is a strong drift of Polar air masses coming down across it. They move south, generally, instead of east over Greenland.

"Now if we would get cross-section of those Polar air masses reported it might be possible to predict our weather, within limits, for three months ahead.

"The general character of a coming season might be learned so that farmers would know whether to plant a wet crop or dry crop. Such reports would be of great aid in the development of commercial air travel across the ocean."

Rainbow point, near Etah, Greenland, where his expedition worked on the weather, would be a good place for a permanent station, MacGregor thinks. So would Thule, in Greenland, 100 miles above Cape York. Devon island, Canada, is another good position.

The new radios are about the last word in perfection, but they still lack a gadget that permits you to tune out your neighbor's set.

A cure has been found for hay fever. It is a serum extracted from ducks. Another quack remedy, no doubt.

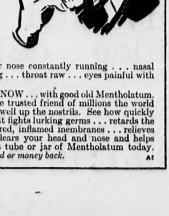
RELIEF FROM COLDS



Soothing, Penetrating . . . This Remedy Brings Relief Overnight

Miserable, aren't you, with your nose constantly running . . . nasal passages inflamed . . . head aching . . . throat raw . . . eyes painful with persistent watering?

Why continue to suffer? Get relief NOW . . . with good old Mentholatum. This famous family remedy is the trusted friend of millions the world over. Rub a little Mentholatum well up the nostrils. See how quickly this healing balm works . . . how it fights lurking germs . . . retards the gathering of mucus . . . soothes red, inflamed membranes . . . relieves that choked, stuffy feeling . . . clears your head and nose and helps keep them clear. Get a 30 cent tube or jar of Mentholatum today. Use it tonight. *Relief is guaranteed or money back.* At

POOR MAN'S GOLD

Courtney Ryley Cooper

—●—

● Courtney Ryley Cooper. WNU Service.

CHAPTER VIII.—Continued

"Watch what you're saying!" Jack exclaimed.

McKenzie Joe eyed him.

"Pick up that gold if you can find it," he answered coldly. "You'll find it's flat, with old scratches on it—scraped out from ledge riffles in the main body of the stream. It never came from gravel."

"Then I was lying?" asked Kay. She swept her glance suddenly to include another figure; Jeanne Towers had rounded the side of the cabin. Kay glared at her, then turned back to McKenzie Joe. "Answer me, was I lying?"

"Yes, you were lying," Joe answered quietly.

"Joe! Take that back!"

"Never mind doubling your fists, Jack," the older man said. "I could kill you the best day you ever lived. But I wouldn't. And I'm going—gettin' out of here."

"One of us has got to go?"

"Sure," the older man said. "I thought that all out—over there in the bush. But before I go, here's something for you. That gold find's a come-on—"

"You've said enough, Joe."

"Sure. I know it. But remember you dangle just a little hay in front of a horse to make him follow you into a corral. You're bein' led into something."

Jack Hammond lunged angrily toward his partner, only to be confronted by Jeanne Towers, a queer, desperate expression in her face. Kay Joyce merely stood still, her lips livid, her eyes strangely narrowed. The Northern girl braced herself.

"Get hold of yourself, Jack," she commanded.

Slowly, Jack Hammond moved back. There was a long silence. Then the younger man asked:

"Well, Joe, do I buy you out—or do you take my share?"

"He can't have your share!" Kay snapped. He's got to go!"

McKenzie Joe looked about him. Uneasily he wiped a shaking hand across his lips.

"I guess the young lady answered for me," he said. Jack stamped into the cabin, to return almost as quickly. He held in his arms four heavy moosehide pouches, lumpy with gold nuggets.

"It's everything I've got," he said shortly. "Sign up and get out."

Jeanne Towers straightened.

"Jack!" she cried. "You fool—you fool!" Then with a half sob, she whirled and ran back to her cabin.

CHAPTER IX.

More than two months had passed since that morning when Jack had walked drearily back from the lake, gaunt with the weight of strange, foreboding sadness. Once the heat of their quarrel had begun to cool, memory had, to a degree, at least, brought about a truce in the bitterness between McKenzie Joe and himself. The signing over of the necessary papers which had put Jack in possession of all the claims had been done in silence, it is true, but not taciturnity.

"Write to me sometime, Joe?" Jack had asked as the older man took his departure.

"Sure—I'll be glad to do that, Jack. If there's anything to write about. And say—"

"Yes?"

"Don't hold it against Jeanne for what she said. Me 'n' Jeanne have always thought a lot of each other. It was kind of natural that she'd take up for me."

"Of course, Joe."

The older man had looked far down the lake, glassy smooth, and with drifting, imaginary islands floating in mirage.

"For that matter, she's always thought an awful lot of you. A lot more'n she did of me."

"I know it, Joe."

The older man had looked at him keenly, his eyes sparkling, as if he were about to say that this was just the trouble, that Jack didn't know it. But he only replied:

"Well, I guess I'd better be getting on—better be takin' advantage of this calm. Old Sapphire gets pretty nasty sometimes."

"Yes—it does, Joe." Impetuously he had put forth his hand. "Shake with me, Joe?"

The prospector had shifted his canoe paddle suddenly and turned to his former partner. Then had come silence, except for the faint grind of callus against callus, the jerky intake of heightened breath. There had been no other sound; only the swish of Joe's moccasins as he had centered his weight in the canoe, and the soft dip of his paddle. After a long time, the ripples had rolled smoothly into glassiness again; and Joe was only a tiny silhouette rounding a faraway bend.

So now, two months had gone by. It was early September, with the nights beginning to be sharp with frost, the foliage of poplar splashing the deeper green, heavier growths with floods of gold, the grizzly wandering the berry patches on the rock slides, and night coming out of the hills more quickly and for longer duration. Yet time had only brought Jack the deeper conviction that McKenzie Joe had been wrong in his suspicions.

"Pretty Good Nugget," He Said at Last.

He was frenzied these days for gold. Early morning found him at his placer workings on Loon Creek, with an extra man engaged to help his two other employees with the gruelling work of raising the gravel from the pit which ran down to the bedrock gravels, and himself laboring hour after hour to shovel the piled-up earth into the ceaseless flow of water of the sluice boxes. There was something in his efforts which amounted almost to desperation; big work was going on above, where he and Kenning were testing out the geologist's theories, and men must be paid, especially up here, north of '58, where labor brought a dollar an hour. Jack and Bruce Kenning were partners now.

Only two things could break the continuity of Hammond's labors—a trip to the upper workings or the announcement of a clean-up from Kay's claim. She had just called to him that the flow of the sluices had been halted.

Jack Hammond dropped his shovel and went upstream. Kay appeared excited as usual, herself taking a pan and filling it with a part of the scrapings. Hammond bent over her at the stream, where, dipping water, she began the work of reducing the conglomerated residue of the riffles to tangible loss or gain. There beside her, as the pan slowly twisted and dipped and raised and circled, it came to Jack that Kay had learned much of mining in the short time she had been here. Now she spoke casually of pockets and faults, of pay gravel and sedimentation—suddenly he halted. The pan had been cleared, the girl had given an exclamation and was bending over it, pointing by a nod to a nubbin of gold which lay there.

"It's a knock-out," Hammond exclaimed, picking out the serrated piece of mineral. Then, as though the better to appraise its worth, he reached into a pocket for his prospector's magnifying glass.

Beside him, Kay talked on of her hopes. She couldn't understand, she said, why this claim didn't pan out more values. Day after day, the output seemed the same—enough for expenses, enough to keep the cottage going and to pay Mrs. Carewe, the woman of all work—but little more. Hammond hardly heard her. Again he was confirming what he had confirmed every day since McKenzie Joe had pulled out—the fact this was true nugget gold and that there was not the slightest indication of sniper material.

That had been a serious charge. It had meant that Kay was pretending to find gold when such had not been the case. Why she should do this, Joe Britten had not fully explained. He had only insisted that the tiny flakes and nuggets were "sniper gold," gleaned by scraping along the flat, ledgelike rocks of the true current of Loon Creek, where, acting in the same manner as the riffles of a flume, these ledges had picked up stray bits of new metal, washed down from the hills by spring freshets. The old prospector had insisted that they were not true nuggets, that the force of water, driving them between thin ledges of stone, had to a degree flattened them and so marked them that the eyes of his deep experience could identify them, thus making it impossible for them to have come from Kay's gravel bar claim. Hammond himself had not been given a chance to look. Kay, in her anger, had thrown them away.

But here was no doubt that Kay's acquisition was true gravel gold. The same had been true on two-score other surreptitious investigations. It was as though Jack Hammond had put Joe Britten on trial, and day after day was repeatedly proving him guilty.

"Pretty good nugget," he said at last. "It must be about a penny-weight."

"All of which helps," the girl answered, with a casual shrug of her shoulders. "Maybe I'll get down to real money some day—you never can tell."

"Nobody can, with gold mining," Hammond answered. After a time he returned to his own labors, again feverish, again driving in his intensity. He knew that this claim of his was beginning to weaken; the nuggets were not as large or as frequent as when he and Joe first had slashed into it. Doggedly he told himself that it could not, must not, flash out. There must be money to keep that work going above, and he knew that Kenning could not furnish it. In truth, Kenning was providing little in the form of funds; they had thrown their holdings into one pot, share for share. But the cash to keep development going must come from Hammond. Kenning made up for his lack of it by his advice.

Remembers King Alexander

Yugoslavia Lives Constantly In Memory Of Slain Monarch

While waiting for 15-year-old King Peter to reach 18 and assume the crown, Yugoslavia lives constantly in the burning memory of his father, Alexander, who was assassinated in Marseille, France, in 1934, while on a visit of good fellowship.

So potent is this remembrance that one might say the late king still occupies the throne, for his people continue to think his thoughts and carry out his plans.

Indeed it is so strong that it formed by the best possible source, for a weakening during the last two years of the bonds of friendship between France and Yugoslavia long before the Czechoslovak crisis came along to do vast damage to French prestige. Folk in this part of the world don't forget.

The people will tell you quietly but with cold precision which speaks of deep bitterness that Alexander lost his life because of insufficient protection.

If you want to get the full force of this feeling go with me across the great public park on the heights above the winding Danube to the ruins of the grim old fortress which still frowns out across the valley as though it really thinks its ancient bones have a fight left in them. There in the military museum we shall see an exhibit of such stark realism as to bring one up with a jolt.

Carefully preserved is every shred of the bullet-torn, blood-stained clothing which His Majesty wore when he was shot down. Laid out at full length in a glass case is his uniform, even to the once white collar with its terrible slit of violence. There is the scarred motorcar in which he was riding. The discolored cushions repeat the tragedy.

Throughout the day crowds linger about this exhibit. A woman was moaning in a state of collapse near the glass case.

From the museum we motor some 60 miles through a lovely rugged countryside to Oplenac. Here is the white marble church of Saint George. Under the shnrch in the royal crypt is the body of the late Alexander. Ever since the assassination his people, including hundreds of thousands of peasants from all parts of the country, have been making pilgrimages to pray by his tomb.

Value Of Used Stamps

Some Buy Free Bed In Children's Hospital At London

We wonder how many of our readers know the value of used stamps. For years our own two Societies have been sending used stamps to three very interested friends of children. They tell us that the used stamps they collect, with others that are sent to London, support a free bed for a child in a children's hospital.

The Royal Society of Great Britain states that "If every person living in the metropolitan area of London were to send one used stamp every week, the Society to which they were sent would benefit to the extent of over $40,000 per year. Foreign stamps, of course, are more valuable than domestic stamps."—Our Dumb Animals, Boston.

Interesting To Grocer

International Affairs Make A Difference To His Business

Your grocer has to take an interest in international affairs whether he wishes to or not, says the Woodstock Sentinel-Review. News from Spain is that General Franco and a 1937 frost have combined to advance prices of Seville bitter oranges for marmalade. Manchurian walnuts on the way are to be cheaper than present stocks. The trade journal, Canadian Grocer, reports that beans are cheaper "since the war scare dissolved."

Many Will Agree

That The Radio In Observation Cars Is A Nuisance

Lucius Beebe, in the New York Herald Tribune, says one of these days some righteous and cash-paying passenger is going to rise and smite the detestable innards out of the nastiest menace of modern human contriving, the radio in the observation car, where you can't escape it. Railroad executives who fancy this obscenity a boon to their fares are driving passengers by the legion to thumbing their ways on the macadam. . . .

There are only about three basic patterns of teeth, and they correspond to grinding tools, cutting tools, and awl-shaped tools for catching and holding.

Stores of Japan may sell only one cotton or leather article to a customer. 2283

A FREE FOLDER FOR YOU

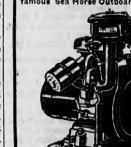
THE PRACTICAL FAMILY GIFT

THIS YEAR IS A

JOHNSON CHORE-HORSE

This Christmas, make the entire family happy with the comfort and convenience of a Johnson Chore-Horse, the practical Gift of constant utility.

Costing from as low as $69.50 (all taxes included), these Johnson Chore-Horse models are light and compact for portability, yet sturdy and strong for constant service under all conditions. Easy to install in basement, garage, or other outbuildings, you are assured constant electric light and generous quantities of power for pumping water, for charging batteries, for radio and for the hundred and one other chores of farm and rural life. Chore-Horse capacities range from 150 to 800 watts and are built by the manufacturers of the world famous Sea Horse Outboard Motors.



FREE FOLDER

We have a free illustrated folder for you that fully explains the advantages and exclusive features found only with these Johnson Chore-Horse models. Investigate this practical utility power-plant today and see what a new era of comfort and convenience it really holds for you.

TOWN OF GLEICHEN

W. J. PHYTHIAN,
Secy.-Treasurer.

Town & District

The U.F.W.A. will hold their next meeting on January 12, not January 2nd as announced in last week's issue of The Call.

Edward Coutts aged 74 years of Eventide Home passed away last week the funeral taking place Friday afternoon at 2.30 with Major Sutherland officiating. Deceased came to the home from Olds about three months ago having lived in that vicinity for many years. He is survived by three sons and one daughter, his wife having predeceased him some years ago.

A great squad of hockey players turned out Sunday for practice a lot of them hoping to get on the Gunner line up. Practically all the old players were on the job including Goalie Roberts who has not lined up with the Gunners for years. He looks to be as good a goalie as ever. Toe pushchasers went through a good work out and were probably a little too enthusiastic for the first time on the ice. The sweat rolled of them and no doubt some of them knocked off several pounds of surplus fat. A lot of them carried off scars as souvenirs for their first work out. Now for a game to start the season off.

CANADIAN MOSAIC

Definitely ranking, in its own field, with his recent book, "Steel of Empire," "Canadian Mosaic" by John Murray Gibbon, general publicity agent, Canadian Pacific Railway, is notable contribution to Canadian literature and to Canadian folk lore.

The book, which contains 434 pages with 24 magnificent colored illustrations from pastels of Canadian types and landscapes by such artists as James Crockart, W. J. Phillips, R. C. A., Kathleen Shackleton, N. de Grandmaison, Ernst Neuman, and R. H. Palenske; and 48 pages of photographs and paintings reproduced in half tone, also contains a number of maps which show the origin of Canada's various racial groups and their settlements in the Dominion.

The Canadian people will remember the broadcast series heard over the C.B.C., national network last winter, entitled "Canadian Mosaic," in which Mr. Gibbon traced the adaptation of Old World music to the growing traditions of Canada's various races in the new land. His "Canadian Mosaic" which appeared at the end of last month is the result of the exhaustive studies made by Mr. Gibbon in the preparation of the broadcast series, and by his amplification of the information then gained he presents a living and vivid picture of the contribution made to Canadian history and culture by the 25 European races from which the Dominion has drawn much of its new blood.

The scope and purpose of the book is explained in the preface: "The Canadian race of the future is being superimposed on the original native Indian races and is being made up of over thirty European racial groups, each of which has its own history, customs, and traditions. While there is still time, let us make a survey of these racial groups—see where they came from, what relationship, if any they had with each other in Europe, what culture they enjoyed and how much of that culture they have been able to bring with them."

This Mr. Gibbon seems to have done very successfully with his usual facility of presentable worthwhile and interesting facts in a manner which is not only enlightening but very entertaining. (McClelland and Stewart, $3.50.)

COMING EVENTS

Dec. 23—Annual Xmas entertainment will be held in Meadowbrook hall.

In response to a call from alarmed observers, police of Levis, Que., raced to a Boy Scout camp, to find a boy tied to a tree, his face apparently covered with blood. The blood proved to be crushed-strawberry make-up for the "victim" part in a Scout frontier drama.

One of the most important branches of scientific work being undertaken in Canada to-day is the research on parasitic worms, which is well into its initial stages at the Instituto of Parasiology. Parasitic worms, which are in no way related to the earth-worm or the bug worm, do an enormous amount of damage to stock and probably form the greatest single source of loss in Canada. Work to date which his involved the carrying out of over 12,000 experiments indicates that the most likely means of ridding Canada of the menace of these worms many millions of which are swallowed during the life time of grazing animals will be through the use of chemical fertilizer.
